

MOHAMED GOMAA ABOBAKER

Data Analyst | Python | SQL | Power BI | Excel

Somosta, Beni-Suef, Egypt | +20 120 408 8513 | mhmdjmtabwbkr@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst passionate about working with data to discover patterns and extract actionable insights. Skilled in SQL queries, Python (Pandas, NumPy, Matplotlib), Excel advanced functions, and Power BI dashboard development. Experienced in data cleaning, data visualization, statistical analysis, and data storytelling through real-world projects covering e-commerce analytics and macroeconomic modeling. Committed to data-driven decision making and turning raw data into clear, impactful reporting. Currently seeking a Data Analyst internship (full-time / part-time / remote).

TECHNICAL SKILLS

Programming & Query Languages: Python, SQL (T-SQL, SQL Server)

Data Analysis & Processing: Data Cleaning, Data Mining, ETL, Statistical Analysis, Time Series Analysis, Data Modeling

Data Visualization & Reporting: Power BI (Dashboard Development), Excel (Advanced Functions, Pivot Tables), Matplotlib, Seaborn

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn (Basic)

Tools & Platforms: SQL Server, Jupyter Notebook, GitHub

Soft Skills: Data Storytelling, Data-Driven Decision Making, Analytical Thinking, Attention to Detail

PROFESSIONAL EXPERIENCE

Data Analysis Trainee

National Telecommunications Institute (NTI) | Egypt | 2025

- Completed intensive hands-on training in end-to-end data analysis workflows including data collection, data cleaning, ETL processes, and statistical analysis
- Practiced SQL queries for data extraction, transformation, and reporting across relational databases
- Built interactive dashboards and data visualization reports using Excel to communicate insights to stakeholders
- Applied Python (Pandas, NumPy, Matplotlib) for data processing, exploratory data analysis, and data storytelling

PROJECTS

Olist E-Commerce End-to-End Analytics

- Performed full end-to-end data analysis on 100,000+ orders from Olist (Brazilian E-Commerce) — covering data cleaning, SQL queries, ETL, statistical analysis, and dashboard development to investigate customer churn and logistics impact on revenue
- Discovered that late deliveries cause a 40% drop in satisfaction (rating: 4.3 → 2.6 stars) and that 89% of returning customers had on-time first deliveries — key insight for retention strategy

- Identified underperforming sellers (24% delay rate) and Northeast regional bottleneck (25% delay rate); delivered data-driven recommendations including SLA enforcement and last-mile courier partnerships
- Tools: Python (Pandas), SQL Server (T-SQL), Power BI | [View Project on GitHub](#)

Impact of Geopolitical Conflict on Egyptian Economy

- Conducted macroeconomic data analysis and data modeling to measure how geopolitical conflicts affect Egypt's inflation, USD/EGP exchange rate, and commodity prices (oil, gold, agriculture) using real datasets
- Engineered a custom 'Tension Level' indicator linking conflict intensity to economic shifts; key finding: rising tensions directly correlate with USD/EGP depreciation, oil price spikes, and increased food inflation
- Built an interactive Power BI dashboard with data visualization covering inflation trends, currency fluctuations, and commodity prices to support data storytelling and reporting for non-technical audiences
- Tools: Python (Pandas, NumPy), Power BI, Jupyter Notebook | [View Project on GitHub](#)

EDUCATION

B.Sc. in Computer Science — Artificial Intelligence Major

Beni Suef National University | Egypt | 3rd Year | Expected Graduation: 2026

Relevant Coursework: Data Analysis, Machine Learning, Statistics, Database Management, Algorithms

CERTIFICATIONS & TRAINING

- Data Analysis Professional Course | National Telecommunications Institute (NTI) | Completed: September 2025

LANGUAGES

Arabic: Native

English: Intermediate
